

Summer Math Assignment for 2019-20 7th graders

In preparation for your responsibilities as 7th graders, complete the following:

1) Read the book of **Proverbs**. Pick out 2-3 pieces of King Solomon's wisdom that you can apply to help you be a more successful student next year. Write/type a half page on these skills/or a mindset for improvement (remember to include chapters and verses) and how they impact your goals for next year.

Also, choose **ONE** of these three items below to do this summer and be prepared to turn in both assignments when you come to see Mrs. Julian in August.

2A) Take on a new responsibility in your household.

This could be something you want to be doing already and aren't (making your bed, mowing, helping with dishes or pets, reading your bible each day) or something new. Many of you already help in many ways! Keep a log of what you do, when and how long it takes. Consider how what you do this summer may prepare you to take more responsibility for your learning and organization next school year and write a ½ page about this.

OR

2B) Write a math word problem based on something you do this summer.

Examples might be: calculating miles per gallon on a trip, finding percent discount, calculating area or perimeter, scales/maps, fractions! Include the problem and the answer key with work shown. Write 2 paragraphs: one about why you chose this problem and one about how this math applies to other areas of life.

OR

2C) Create a balanced menu for the day (breakfast, lunch, and dinner) for your family. Research how many servings of each food group you should get per day. In your final draft, include a menu which states what each of the three meals will consist of (a meal should have a variety of colors too). Go online to one of the grocery stores that are in our area and calculate the price of each meal to serve your family. Write/type a half of a page stating what factors you had to consider when planning your meals.

Looking forward to a great 7th grade year! Have a great summer!! Mrs. Julian and Mr. Bruhn
