

AP[®] Calculus Mathematics Track Pre-Registration Form/Application for Double Enrollment in Geometry and Algebra II during Sophomore Year

St. Thomas More offers AP[®] Calculus to advanced mathematics students who have a passion for the subject and are interested in continuing the study of mathematics during their senior year. This is a college level course following the curriculum of the Advanced Placement program. In order to enroll in AP[®] Calculus at STM, students must have completed four credits of high school mathematics (Algebra I, Geometry, Algebra II, Trigonometry & Pre-Calculus) prior to their senior year. Students would need to be enrolled in Algebra II as a sophomore in order to complete the course prerequisites for AP[®] Calculus. If a student wishes to have double enrollment in Geometry and Algebra II during sophomore year to accomplish this end, recommendation from the department must be obtained. A student should have a minimum 3.75 GPA in Algebra and an overall 3.25 GPA to consider double enrollment

A student interested in double enrollment should fill out the following form, attach an unofficial transcript, and provide a typed essay discussing his/her strengths, and the desires and reasons for wanting to take AP[®] Calculus as a senior. The mathematics department and the administration will determine the recommendation prior to the course registration date. Final acceptance will be determined upon the completion of Algebra I.

Please note: A student meeting the GPA qualifications is not guaranteed a recommendation for double enrollment.

Name _____

Parents and Students: please read the following carefully before signing:

If recommended for double enrollment, I/my child understand(s) that I/he may choose to enroll in two mathematics courses for the purpose of completing the course sequence necessary to enroll in AP[®] Calculus senior year for which I/my child am/is expected to enroll. We have discussed the implications of this decision as it pertains not only to the sophomore year but also to the junior and senior years of high school.
